PROJECT

CERAMIC. ROBUST. DURABLE.

DESIGN WOOD FLOORING

PROJECT BY HAFRO

HIGH-QUALITY OAK IN EXCLUSIVE GRADING

Knot-free, exceptionally clean wood structure with a uniform, elegant surface. For a calm, high-quality appearance with clean lines.

CERAMIC-REINFORCED SURFACE

Ceramic coating enhanced with corundum ensures exceptional durability, high scratch resistance and optimum performance in high-traffic areas..

FINE-BRUSHED TEXTURE

The lightly brushed surface highlights the natural grain and gives the design wood flooring an authentic texture that is pleasant to the touch.

SUSTAINABLE CONSTRUCTION

The use of carefully processed recycled materials creates a resource-efficient core layer with high stability.

DEVELOPED FOR DEMANDING PROJECTS

The design wood flooring is ideal for large-scale applications requiring consistently high quality – durable, resilient and economical at the same time.

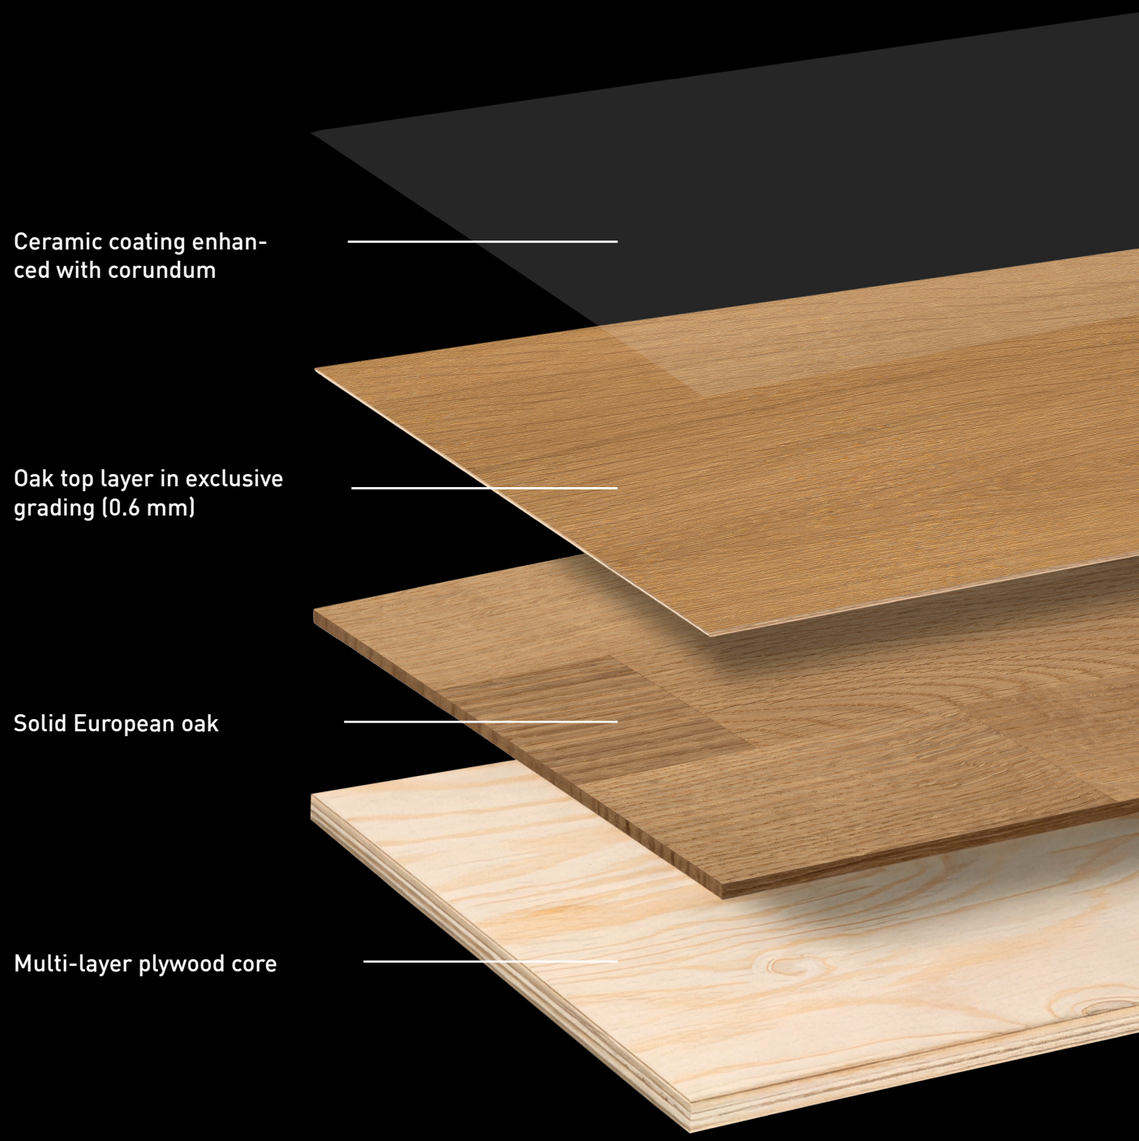

DESIGN WOOD FLOORING

CERAMIC COATED

CERAMIC. ROBUST. DURABLE.

CONSTRUCTION

HAFRO PROJECT combines the best of high-quality oak in exclusive grading – characterised by an exceptionally clean, knot-free wood structure and a uniform, elegant surface.

MADE IN ITALY

Highly durable ceramic coating with a fine-brushed texture

GIN TONIC

WHITE LADY

DAIQUIRI

CUBA LIBRE

IRISH COFFEE

Recommended retail prices in EUR/m², excl. VAT.

GRADING

Exclusive appearance

An elegant appearance characterised by natural colour variations inherent in the wood, giving the material its unique character. A lightly brushed texture emphasises the natural structure of the wood and provides a pleasant, authentic surface feel.

Occasional pin knots create a subtle, lively appearance and emphasise the natural character of the material. No sapwood is present, ensuring a high-quality and uniform appearance.

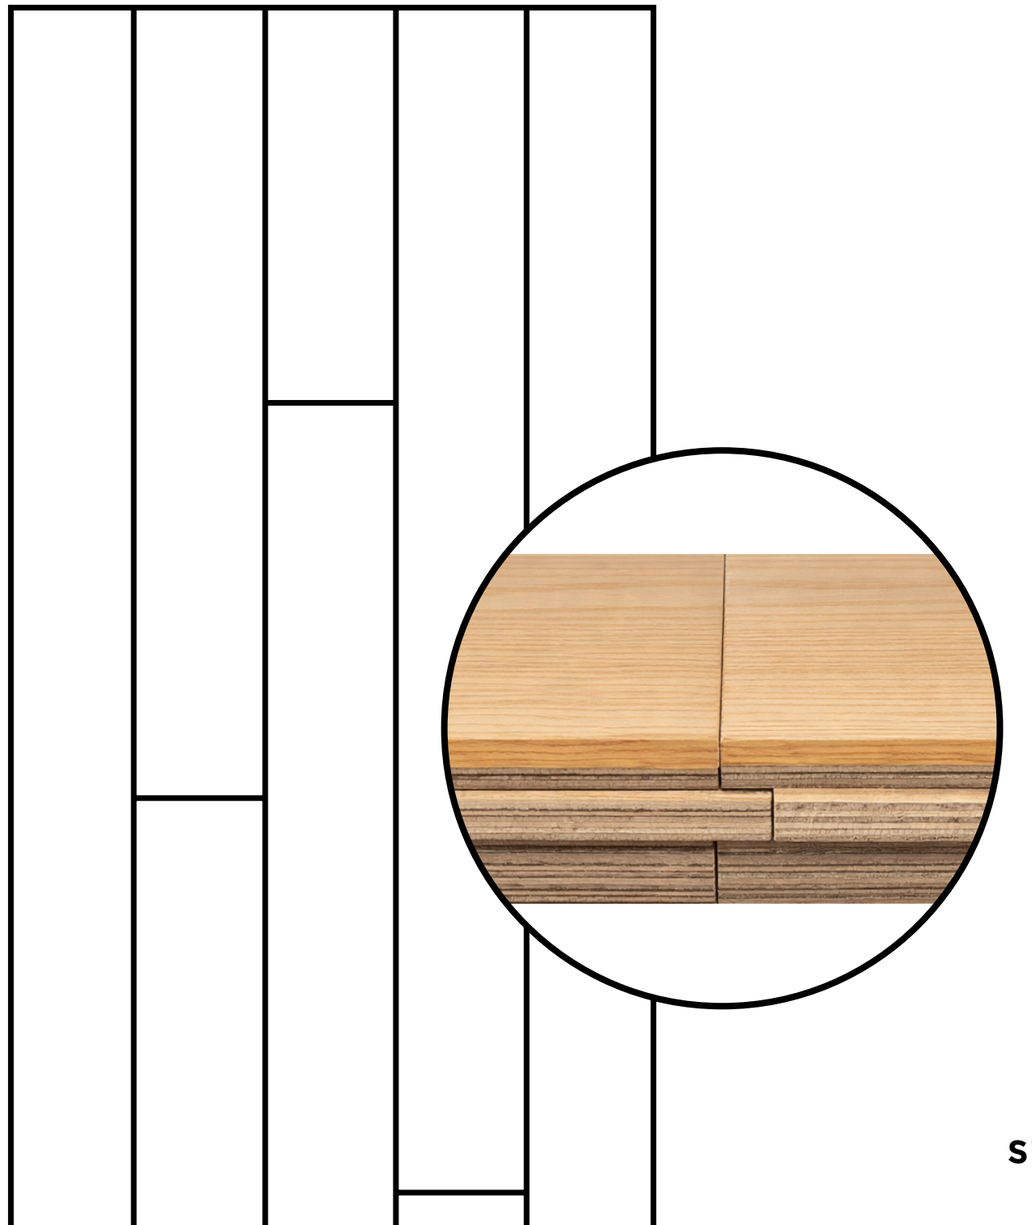

FORMAT

Balanced dimensions for a calm overall appearance

15 mm with 3.4 mm oak construction and 0.6 mm oak top layer
Tongue & groove with bevel

15 x 185 x 2000 mm

TECHNICAL DATA

Maximum performance. Long-lasting durability.

TOP LAYER

High-quality oak in exclusive grading with an exceptionally clean, knot-free wood structure. The homogeneous surface creates a calm, uniform appearance and emphasises the premium character of the design wood flooring.

SURFACE

High-performance ceramic-reinforced coating with corundum content. This specially developed surface offers maximum scratch resistance, high abrasion resistance and is ideally suited for use in high-traffic commercial areas.

TEXTURE

Fine-brushed surface designed to highlight the natural grain. This gives the design wood flooring an authentic, tactile structure and a premium, natural appearance.

CONSTRUCTION

Durable, resilient and easy to maintain. The design wood flooring has been specially designed for demanding applications and offers high load-bearing capacity as well as consistent quality across large areas.

SUSTAINABILITY

Resource-efficient production through the use of recycled materials in the core layer. This ensures the efficient use of natural raw materials and reduces the ecological footprint.

DESIGN WOOD FLOORING

CERAMIC COATED

CERAMIC. ROBUST. DURABLE.

MULTI-PURPOSE

HAFRO PROJECT design wood flooring has been specially developed for demanding commercial applications. Whether in hotels, restaurants or premium residential projects, the flooring impresses with its resilience, durability and reliable performance in everyday use.

WATER-RESISTANT

The high-quality construction of the design wood flooring provides increased resistance to moisture. This makes it ideal for areas exposed to higher levels of moisture, such as hotel bathrooms, spa areas or kitchens.

HYGIENIC & CLEAN

The durable surface of the design wood flooring supports the highest standards of hygiene in daily use. It is designed with antibacterial properties and ensures a permanently clean and well-maintained appearance – ideal for use in the hospitality sector.

EASY TO CLEAN

HAFRO PROJECT design wood flooring is designed for economical and time-saving maintenance. The surface is easy to clean and helps to minimise ongoing maintenance requirements.

C_{FL}-S1

REACTION TO FIRE

C_{FL}-S1 = flame-retardant with very limited smoke development when fully bonded to a non-combustible substrate. Please refer to the catalogue for the relevant reaction-to-fire classification.

FORMALDEHYDE

We exclusively use NAF adhesives (No Added Formaldehyde) to consistently implement our environmental policy aimed at reducing indoor emissions.

CE

CE MARKING

The CE marking confirms that the product complies with the applicable European requirements regarding safety, health and environmental protection. It represents tested quality and ensures unrestricted use within the European market.

MADE IN ITALY

MADE IN ITALY

Manufactured in Italy stands for high quality standards, precise production and short transport distances. Production is subject to strict European regulations and guarantees responsible, sustainable manufacturing.

SKIRTING BOARDS

The perfect finish

The perfect finish – subtle, clean and architecturally precise. Skirting boards create a harmonious transition between floor and wall and give every room a cohesive overall appearance.

With its minimalist, modern design, the PROJECT CUBE skirting board from the HAFRO PROJECT range integrates elegantly into a wide variety of interior concepts. Its clean lines emphasise the premium appearance of the flooring and ensure a neat, stylish finish.
